APPLICATION 9899 PERMIT 6008 LICENSE 4443

ORDER CORRECTING POINT OF DIVERSION
AND AMENDING THE LICENSE

WHEREAS:

1. License 4443 was issued to the Hallwood Irrigation company on January 15, 1957, pursuant to Application 9899 and was recorded with the Yuba County Recorder on January 18, 1957.
2. Inspection of July 2, 1991, found that the description of the point of diversion must be corrected.
3. The State Water Resources Control Board (State Water Board) has determined that said correction will not initiate a new right nor operate to the injury of any legal user of the water.
4. The continuing authority condition in the license should be amended to conform to Section 780(a) of Title 23, California Code of Regulations.

NOW, THEREFORE, IT IS ORDERED THAT:

1. The condition of the license regarding the point of diversion be amended to read:

North eight hundred (800) feet and East three hundred (300) feet from the SW corner of Section 29, T16N, R5E, MDB&M; being within the SW $\frac{1}{4}$ of SW $\frac{1}{4}$ of said Section 29.

California Coordinate System: Zone 2, North 562,400
East 2,157,650.

2. The condition of the license regarding the State Water Board's continuing authority be amended to read:

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

27

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.
